LEADING ARTICLE

Seduced by the beauty of evolution. It’s time to impress.

What is design? At a time when we live under a constant and ever-accelerating information barrage, it’s time to take a break and redefine the concept of design.

Everything that surrounds us and has been created by human has a purpose, and therefore has been designed. Design involves reflection, time and experience to achieve a result. However, the immediacy to which we are subjected, linked to the ‘wow’ effect of what we see and consume, has distorted this concept and there is a tendency to think that design is everything that is beautiful or trendy. Big mistake! Each of the objects we use in our everyday lives is design.

As Danish designer Finn Juhl (1912-1989) said, ‘You can’t create happiness with beautiful things, but you can ruin a lot of happiness with bad ones.’

A well-designed product will fulfill its function while maintaining aesthetic emotion. At Avila Dos we follow our analysis process to understand the user’s needs and provide solutions through organized and imaginative thinking. Solutions that work and affirm aesthetic emotion. Today we fill our pages with novelties that show a path: the evolution towards an eternal destination, never a finish line.

EMOTIONAL INVOLVEMENT IS OUR CORE VALUE

'With Avila Dos we find solutions to all our projects'

Design Interiorismo & Decoración is an interior design and refurbishment studio with showrooms in El Viso del Alcor (Seville) and El Rompido (Huelva), whose philosophy is based on three fundamental principles: inspiration, creativity and exclusivity.

READ THE FULL INTERVIEW AT WWW.AVILADOS.COM

What is the origin of Design Interiorismo?

The origin dates to 2010 with the creation of the first company focused on interior design with wood as the central axis. We had our own production. In 2013 we made the jump to integral interior design with the experience of the interior designer María Reyes Benítez.

How would you define your style?

We consider our style a mix of classic, modern and industrial.

We have developed an intense apprenticeship over the years that we have been able to officially certify but we firmly believe that the main ingredient is the emotional involvement with the clients in what we consider, in most cases, the project of their lives!

Is interior design a luxury?

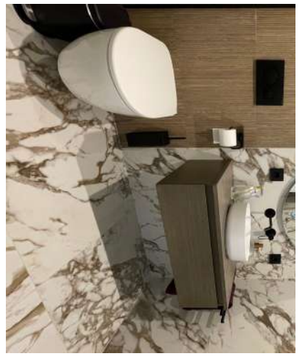
We don't focus it like that, we address it from a comfort point of view, nothing better than to live well in your own home, and wherever you look everything is beneficial for your mental health, colours, aromas, design, materials, etc.

What do you consider to be the key to a modern home?

The basis is to look for absolute peace, projecting for it, many neutral tones, and always looking for environmentally friendly raw materials and oriented toward products with very natural finishes.

How would you describe your houses?

Our homes are, just that, homes. The place where we take refuge and compensate for the daily stress we are subjected to. Nowadays being an executive is an arduous battle, and it is at home that we find the energy we need to recharge.



We consider that each and every one of our houses is destined to be a contribution of energy, vitality and happiness in each of our spaces created in them.

How do you see yourselves in 10 years?

The vision is to continue growing in interior design, to carry out projects that are very focused on achieving the great dreams of our clients, and to have many more clients who are satisfied with our good work with respect to our projects.

ABOUT THE BATHROOM

What are the essential factors to consider in a bathroom renovation project?

First, analyze the client from the perspective of their needs. Then, together with the team, develop the project to be carried out to meet all the requirements for its perfect completion.

Has the bathroom become a key space for renovations?

Totally, and this is how we approach it, the bathroom must be the most comforting area of the home, in which we take refuge after or before all the daily stress to which we are subjected to, on a daily basis.

DESIGN_INTERIORISMO_DECORACION

ABOUT AVILA DOS

What values do you find in the Avila Dos brand?

With Avila Dos, we found the solution to all our projects. We love the variety of product they have in their catalogues, you can find modern, classic, industrial, Nordic! It does not go unnoticed in any of their styles!

And in their product?

The product is unbeatable due to the care they take in its manufacturing, production, packaging, etc. Few manufacturers offer so many styles and such a wide range of colours and combinations between them.

Which of their collections do you love?

The collection I love the most is the Blanca collection, without a doubt.

I could talk about many, but the most gratifying, of this 2024, has been the project of the Villa of Rubén and Mari, in Urbanización La Motilla, in which I proposed a new collection of several suspended furniture among them the Advance collection, with circular washbasins in color, inspired by the illusion of their project, in the way of approaching what it meant for them, making use of colors, which were super emotionally enriching for them.

If you were to start over, would you do the same thing and would you have done it the same way? What would you change?

Well, yes, in a thousand lifetimes we'd do the same thing we do. It's very emotionally rewarding. We don't consider it a job; it's something innate that's born within us. Every day is a new dream. Knowing that we can contribute to turning a project on paper into a reality of people's dreams and emotions. Making our clients feel 'infinitely happy'!!
